All nations from the remotest ages, have has ships but Columbus only found out the way to America. Before the time of the great Spanish mavigator, people were only enabled to paddle about the shores. Just so with the Life Medicines. It is but two short years since I first ventured upon an unknown ocean, and I have discovered the precious object I was in search of—nexarm. Vegetable medicines were indeed known when I commenced my search but their use was not. By the use of them, I have not only passed from the dejected invalid, to the hal, ocearly and active man of business, but, comparatively speaking, I have renewed my youth. I can thus with confidence of my own experience saves with my fellow citizens. Does the reader want groof that the Vegetable Life Medicines are suitable to his own case? I have on file at my office, able to his own case? I have on file at my office, 540 Broadway, handreds of letters, from some of the most respectable citizens of this my native and, voluntarily officers in testingny of the virtues of A GOOD VEGETABLE MEDICINE.

cine.

Although Dr. B. has enumerated by name the above diseases, he is nevertheless of opinion with ine grandfather, the late ecletrated Dr Wm B andreth, that there is only ene disease, an innerty of the identity which by impeding the circulation, brings on inflamation and consequent derangement in the ergan or part where such impurity of the blood settles; and that it is the different appearances which this inflamation or derangement put or, that have caused medical men to designant such a pre-arances by various names, but which are have caused medical men to designate such appearances by various names, but which are in fact, only the same disease, with more or less virulence. Dr. Wm. Brandrethwas so thely convinced of the truth of the above simple theory, that he spent 30 years in experiment and laborous research into the medicinal projecties of the numerous plants composing the Vegetable Kingdom; his object being to retipose a medicine which should at once partire, and produce by specific action, a removal of all basi numers from the blood by the stomal and bowels, as by the continuation of the

head or feet, in the brain or meanest member; whether it be an outward ulcer, or an inward alserses, are all, though arising from many causes, reducible to this one grand effect, namely, impurity of blood.

In all cases they will be found a safe and simple remedy, yet all powerful for the romoval of disease, whether chronic or recent, infectious or otherwise; and what makes them particularly adapted to this country, is that there is not the slightest liability to cold when there is not the sightest liability to cold when taking them, indeed the system is absolutely inconsiderable of cold when noder their diffu-ency, than at any other time—therefore in this chinate they are novaluable. Neither do they require change of dort or care of any kind— to England these Fulls have been the only incotance of many families for periods varying mora forty to sixty years and have always powed effectual in restering health whenever an alternation from it has occurred.

In many cases where the dreadful ravages of discretion had had bare legament and bone and where to all appearance no fuman means ould save life, have patients by the use of these pulls been restored to good health, the contring disease having been perfectly erad-
